Subject: Re: Have NO IDEA why this translated as a blank page last night! Sorry!!!

Hey Mark,

Thanks for resending. I was having email issues at the hotel last night and couldn't respond. After a couple more calls with ORC and OGC, I've made a couple change for consistency with our other language. I've also included Lori Cora on this so she can make sure it looks ok. Lori--the "ODEQ is now on schedule to..." language was supplied by ODEQ.

On December XX, 2018 the EPA identified 999 water quality limited segments (WQLS) for inclusion on Oregon's 2012 303(d) list of impaired waters. WQLS included on the State's impaired waterbody list are in need of a Total Maximum Daily Load (TMDL) and will now be incorporated into Oregon's TMDL schedule.

"As part of the approval, EPA also affirmed Oregon's decision not to list marine waters with respect to aquatic life impairments, primarily because no direct impacts to marine life have been documented in scientific observations within Oregon's territorial limits."

The remaining part looks good as it.

"On December XX, 2018 the EPA transmitted 999 additional listings (Water Quality Limited Segments) for Oregon to incorporate into its current (2012) 303(d) list of impaired waters. By being added to the State's impaired waterbody list, Oregon must now create a restoration plan (TMDL) for those additional 999 listings.

"As part of the approval, EPA also affirmed Oregon's decision not to list marine waters with respect to aquatic life impairments, primarily because no direct impacts to marine life have been demonstrated from corrosive waters within Oregon's territorial limits."

ODEQ is now on schedule to:

- Produce an Integrated Report and 303(d) list every two years.
- Develop its 2018 Integrated Report and 303(d) list and anticipates initiating the call for data for the 2020 Integrated Report in winter 2019.

- Deliver process improvements including a statewide call for data, modernization of data infrastructure, and a clear and transparent assessment method.

BACKGROUND

On November 5, 2014, the Oregon Department of Environmental Quality ("ODEQ") submitted Oregon's 2012 Section 303(d) list of water quality limited segments ("WQLS") still requiring a Total Maximum Daily Load (TMDL) ("Oregon's 303(d) list"), to the EPA.

EPA's list review determined that ODEQ failed to assemble and evaluate all existing and readily available data and information for water bodies of the state when developing Oregon's 2012 Section 303(d) list. Specifically, ODEQ failed to evaluate readily available data and information for pollutants such as: alkalinity; ammonia; aquatic weeds; bacteria; bio-criteria; chloride; chlorine; chlorophyll; dissolved oxygen (outside the Willamette and Umatilla Basins); marine waters; metals; nitrates; pH; phosphorus; temperature; tissue of fish and softshell clams; total dissolved gas; and toxics outside the Willamette and Umatilla Basins.

For more about EPA's review of Oregon's list, added listings and public comments received: please visit:
